(In Grand Central Station)

**Positive Spin is a non-profit corporation
under West Virginia law and federal
501(c)(3) provisions.**

Did you know...

- The typical department store bicycle is only ridden 70 miles before being discarded (usually to a landfill).
- Americans throw away 15 million bikes every year, many could be recycled.
- Automobiles are a significant portion of solid waste in every community. If more trips are taken car-free, there will be fewer cars to dispose of .
- Bike shops, stores, bus operators and police departments keep unclaimed bicycles. If they are not claimed they are often discarded.
- In Morgantown Positive Spin recycles about 1000 bikes every year, diverting about 35 tons from landfills. Restored bikes are reducing traffic and improving health of individuals and the community.

Helping You Support Bike Recycling and Bicycling in Your Community

Morgantown, WV

Positive Spin is a service and education organization whose goal is to promote sustainable transportation and development. We support citizens who choose to walk, bike, bus and carpool.

Thank You For your Support.

Sustainable Transportation in Morgantown Since 2005

Recycled bikes: About 1000 bikes/year come through our doors instead of going into the landfill. Many of them become transportation and recreation for local residents. Proceeds support our projects.

Advocacy: Advising City, School and regional leaders about existing and emerging opportunities for sustainable transportation

Information: Website forums and links to walking, biking, transit and carpool resources.

Bike Parking Design: For Morgantown and WVU, to help support citizens who ride to work and school.

Technology: Developing pedal generators for human-powered electricity.

Christmas Bikes: We fixed and donated 70 bikes for Christian Help's toy drive and other local charities.

Positive Spin has also....

- Given presentations to local civic and environmental groups
- Given citizens a forum to discuss and act positively for Morgantown's transportation future.

We can help you establish programs in your community to promote bike recycling and sustainable transportation for everyone.

We Offer....

Discount Helmets and locks Member bike services

- Shop facilities, tools
- Expert repair assistance
